

## Regarding the optional home exam

Most or all of this information has been presented to you at the introductory lecture or the latest lecture. However, since not all of you have had the opportunity to attend all lectures, here is a short summary:

- The exam is optional. In practice, this means that if you fulfill your other obligations in the course and your project is passed, you will receive the grade “3” without taking the exam. If you want a grade of “4” or “5” you need to take the exam.
- No grade will be lowered by taking the exam. That is, even if you receive very few points on the exam, you will still receive the grade “3” given that your project is passed etc.
- The exam will take place between 9 and 16 on Friday, February 16. At 9 o’clock the questions will be uploaded on the student portal and your answers should be uploaded before 16 (4 P.M.).
- There will only be a few, at the most 5, questions. One or two fact based ones and a few questions that will require you to reflect and discuss using concepts and techniques covered in the course.
- You may use any material that you can find in answering the questions as long as you reference the sources you have used.
- You may not cooperate when answering the questions.
- The exact instructions on referencing etc. will be supplied with the questions.
